Final Rejection

Applicant's arguments filed 2/23/04 have been fully considered but they are not persuasive for reasons detailed below.

The prior art rejections are maintained or modified as follows:

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-6 are rejected under 35 U.S.C. 102(b) as being anticipated by

Applicant's Admitted Prior Art.

Applicant teaches an apparatus and method (Fig. 1 and 2) comprising separating pin chips (pin chips screened in 8 and conveyed via 9 to a bin) and dosing said pin chips to a subsequent process (conveying pin chips in 11 to a subsequent process near 7). Here, Applicant's admitted prior art expressly teaches that "pin chips are dosed into the accepted fraction fed to the subsequent process, using a constant ratio" (Spec., p. 1, ln. 24-25). Thus, it is implicit that some type of pin chip dosing apparatus is taking a desired amount from the bin and directing the "excess" pin chips, simultaneously, to a different location (e.g., near 12; spec., p. 2, ln. 30-32). That is, a desired amount of pin chips is being taken from the bin based on the "constant ratio" for dosing and chips in excess of this amount may remain in the bin or may be transported to a separate

location. In either case, excess pin chips are simultaneously being directed to a different location than the subsequent process.

Allowable Subject Matter

Applicant's amendments and arguments are not persuasive as the claimed invention in claims 1-6 remains anticipated as detailed above.

Claims 7 and 10, however, are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Election/Restrictions

Applicant's election with traverse of claims 1-6, 7 and 10 in the reply filed on 8/24/04 is acknowledged. The traversal is on the grounds that the prior examining authority failed to restrict the claims, that the restriction runs afoul of the applicable laws and that no burden exists on Examiner. This is not found as this Office is not bound by the decisions of another examining authority, the restriction is proper under PCT Rule 13.1 and no burden requirement exists in this type of restriction.

The requirement is still deemed proper and is therefore made FINAL.

A complete reply to the final rejection must include cancellation of nonelected claims or other appropriate action (37 CFR 1.144) See MPEP § 821.01.

Examiner has maintained the prior art rejections, statutory rejections and drawing objections as previously stated and as modified above. Applicant's amendment necessitated any new grounds of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a). The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
